

Ecotopia Biketour is an eco-mobile do-it-yourself community that is practising aspects of activism, alternative ways of organising and sustainable living throughout different regions of Europe. The Biketour is open for anyone interested in DIY, environmentalism, activism, community life and learning experientially from challenges, cultures, and from each other.

When on the road, we share skills, practice consensus and act communally to create a non-hierarchical environment. We cook local food using a self-built rocket stove, camp and carry everything on bikes and trailers – we are an evolving intentional community! We visit projects in the fields of self-reliance, low-impact communal living, social and environmental activism and cycling, to learn from them and while helping out in exchange. If you know a project which could host us please write to us!

From 11th July until the end of September 2014 Ecotopia Biketour will be cycling through the Southern Balkans: Sofia - Nis - Pristina - Skopje - Thessaloniki - Chalkidiki - Evia - Athens.

Come and join us!
